

## Designers Saturday Oslo

8-10 September 2017

**Luceplan features Daniel Rybakken with his latest product Amisol, on the occasion of Designers Saturday Oslo.**

Luceplan pays tribute in Oslo to one of the world's most acclaimed light designers of the moment who is collaborating with the brand since many years, giving birth to iconic pieces such as **Counterbalance**, and **Ascent**, both winners of Compasso d'Oro Award in 2014 and 2016.

*"Daniel has amazed us from the outset with his talent, and we are truly satisfied with this collaboration. His work for Luceplan is rigorous and engaging at the same time, essential but capable of interpreting the most advanced technology in a poetic way"* says Patrizia Vicenzi Business Leader Luceplan.

Daniel designs light, shapes visions, stimulates interaction. He takes into account not just form and function but light and dark, graphics and mechanics, positive and negative space.

Behind his creations there are intense, vibrant inspirations, the result of an effective fusion of intentions and visions between the company and this outstanding designer on the international scene.

A striking proposal capable of astonishing with the charm of its brilliant intuition that becomes concrete materialization. The idea is transformed into something that can be shared and used by all, thanks to the fundamental contribution of technology.

It is the case of **Amisol**, an evocative lighting solution that made its world premiere at EuroLuce 2017. Halfway between design and art, **Amisol** has a decorative character that conceals surprising technological complexity. A pendant light that occupies a large physical space with a minimal volume, for easy orientation in space. The lamp features a translucent white film or metallized mirror membrane stretched inside a circular aluminum profile. Like a solar sail, a light source connected to the disk with thin rods, projects a beam of light onto it. By altering the length and the connecting points of the two supporting wires, the rotation of the disk can be set in any angle. Blending technological innovation with impeccable aesthetic refinement, Amisol perfectly embodies the spirit of **Luceplan**.

The latest novelty by Rybakken is presented at the Luceplan showroom in Oslo together with many products from the official catalogue and the most recent introductions, among which the iconic **Mesh** chandelier by Francisco Gomez Paz, the acoustic lamp for the workplace **Diade** by Monica Armani and the company's icon **Costanza** in an elegant new brass color finish, which works perfectly with today's tastes in interior design.
